EXHIBIT A - An internal presentation produced at least as early as 01/01/1999 showing that the invention set forth in the above patent application was conceived at least in part by me at least as earlier as 01/01/1999.

STATEMENT: I, Tal Givoly, hereby state that the invention in the above application was conceived at least in part by me at least as earlier as 01/01/1999, as evidenced by EXHIBIT A. Such invention was conceived of as being capable of identifying a voice call prepaid account associated with a user; receiving a plurality of packets over a network interface, the packets being representative of a voice call over a network; filtering the received packets; analyzing the filtered plurality of packets to identify at least a first flow; identifying an application for the at least a first flow; selecting a corresponding application flow identifier for the application; using the corresponding application flow identifier to identify a plurality of flows in the plurality of packets corresponding to the session; altering accounting operations based on a type of the identified application; charging for the voice call against the voice call prepaid account; and terminating access to voice calls by the user if the voice call prepaid account is exceeded, as well as various other features embodied in the claims and specification of the above patent application.

From this exhibit and statement, it is clear that the invention in this application was conceived of at least as early as 01/01/1999.
